

MODOLUCE

THE ART OF TECHNOLOGY

A company profile and more...

MODO LUCE QATAR was founded in 2015, as a family with a history in the lighting industry since 1997 in Beirut-Lebanon. Their goal was to create a new, separate, dynamic, mainly technical, and conceptually different company from the one previously established by their already successful forefathers (then based in Beirut, a landmark in chandeliers ,light fittings for all kind of projects), a task at which they have truly and gracefully succeeded.

In 1998, We joined the partnership to contribute his 15 years of expertise in the lighting sector, thus completing the highly talented, management team. Today, MODO LUCE CO. has grown to become a renowned company not only in its birthplace, Lebanon or Qatar but throughout the Middle-East. It has unfolded into a group of companies, each with its own specialized task, each with its own skilled management and staff, each with its own success story.

MODO LUCE qatar has managed to contend in a rapidly changing commercial landscape, creating a functional and responsive professional lighting platform all over the Middle-East and still expanding. It also has an objective shared by all; by its solid management; by its Designers and Engineers, by its best trained sales and marketing forces in the region, and that is to become a World Class Lighting Group, and of course a Market Leader in the Middle East area. This concrete goal is the essence of the continuous and unyielding search for excellence in execution. Several different operations exist today and share the load to sustain and provide complete and expert solutions for lighting and control systems,.

Is a joint venture with Fabrica contracting This new venture so the light in 1-07-2015 and having the agencies for the following international lighting brand names:
